

1. TITLE

Dynamic Model of the GASTone System at Vehicle Level

2. NAME OF THE SPEAKER

Estefanía Hervás Blasco

3. CURRICULUM

Estefanía Hervás Blasco graduated as mechanical engineer at the Technical University of Valencia (Spain) in 2011. Afterwards, she focused on sustainable energy technologies and completed a master on Industrial engineering at the University of Oklahoma (US) in 2012. After, she worked as manager in a beverage industry assuming the responsibility of achieve the most efficient shift work production. In 2013 she worked as market analyst for GDFSuez assessing in project to define the future strategy of the global company. Since 2014, she has been involved within the GASTone project in the Institute carrying out with modeling and dissemination tasks. Currently, she is a PhD student (on optimization of thermal systems efficiency) at the Institute of Energy Engineering at the Polytechnic University of Valencia.
